

PD-L1: a novel prognostic biomarker in head and neck squamous cell carcinoma

SUPPLEMENTARY MATERIALS

Supplementary Figure 1: PD-L2 immunohistochemistry in HNSCC. Representative images of HNSCC demonstrating negative (A), low (B), and high (C) PD-L2 protein levels.

Supplementary Table 1: Clinico-pathological characteristics of 97 HNSCC of the first cohort and association with PD-L2 expression.

See Supplementary File 1

Supplementary Table 2: Clinico-pathological characteristics of 127 HNSCC of the second cohort and association with PD-L2 expression.

See Supplementary File 2
